The New Mexican is the oldest newspaper in New Mexico. It is sent to every Postoffice in the Territory and has a large and growing circulation among the intelligent and progressive people of the southwest.

ADVERTISING RATES.

Wanted—One cent a word each insertion. Local—Ten cents per line each insertion. Reading Local—Fifteen cents per line each insertion. Displayed—Two dollars an inch, single column, per month in Daily. One dollar an inch, single column, in either English or Spanish Weekly. Additional prices and particulars given on receipt of copy of matter to be inserted.

FRIDAY, JULY 29.

The New Mexican war correspondents are alright.

Manila has surrendered. Admiral Dewey, true to his record, did it up.

Whenever Admiral Dewey decides to come home, he can have a rip roaring, good, old time and nothing will be said about it.

It will not be necessary for the Ladies' Soldiers' Aid Societies to send bed linen to the boys at Santiago. The rain falls in sheets in Cuba.

If Ben Butler were alive and in command at Santiago de Cuba, he would have that yellow fever town clean and healthy in ten days.

The Texas Populists are apparently endeavoring to establish a powder house in shoe. They have nominated candidates for governor and lieutenant governor.

The American dude will hereafter be compelled to walk stiff legged. The Prince of Wales has smashed his knee cap and will be lame for the remainder of his life.

For the latest, best, most reliable territorial news you will do very well indeed to read the SANTA FE NEW MEXICAN. In this case seeing and reading means believing.

If it was the purpose of Scoville, the yellow journal correspondent, to gain notoriety by slapping General Shafter in the face at Santiago, he succeeded most notoriously.

Three months ago Captain General Augustus swore he would never surrender to the "Yankee pigs." But it is beginning to look as if the august Augustus has had to change his mind.

The rubber producing qualities of corn are something wonderful. A substitute for rubber is made from the oil extracted from the grain, and the farmers rubber neck in gathering the ears.

Admiral Dewey is evidently in need of more money to pay expenses while loafing around Manila bay. Anyway he has gone after more Spanish gunboats, and the United States pays prize money for the capture of an enemy's vessels.

Colonel Roosevelt is not what is known as a practical politician, but his thoughtful remembrance of the wounded "Rough Riders" in the hospital at Governors Island will in no wise injure his chances for election as governor of New York, should he make the race.

The revenue laws of the territory should be strictly constructed by the courts. The system of annual and regular appropriations for territorial expenses since 1899 has worked well and is doing the territory good. The system is the one in force in all states and also in vogue in the administration of the finances of the federal government.

It is claimed that the wounds resulting from the use of the Mauser rifle and its pencil-like projectile are small and clean cut, the bullet not tearing the flesh like the missiles used in the past. It is no doubt a great comfort to a man going into battle to know that if a hole is punched in him it will be a neat one, and no fringe will have to be trimmed off the edges.

General Aguinaldo, the Philippine insurgent leader, has evidently not been educated in Biblical lore to the extent that he should have been. Had his early education been directed more in that line a few sayings like "pride goeth before a fall," "sit not in the seat of the scornful," and "don't get gay" would come to his mind and prevent him making a fool of himself.

Our contemporary, more or less esteemed, the Albuquerque Democrat, worries itself some about the New Mexican. It will have a deal of worrying to do before the coming campaign is over, as far as this paper is concerned. Coming events cast their shadows before. Delegate Ferguson will be re-nominated that is sure. And the signs of the times are that he will be defeated. The Democrat may not think so, but that is of no material consequence and will not change the resistless course of events.

The three troops of New Mexico volunteers engaged in the actions at Santiago de Cuba received, so far as known, but one promotion from the ranks to a commission. As they constituted nearly one-half the force of the "Rough Riders" there engaged and as it is announced that a half dozen promotions from the

ranks were made, they should have received more recognition. The New Mexican proposes to stand up for "Our Rough Riders." They did their duty manfully, gallantly and successfully and lost heavily in killed and wounded and they should have fair and due treatment. Where rests the blame?

The following promotions of clerks in the Treasury department, credited to New Mexico, are reported:

Edward Webster, \$1,400 to \$1,600; J. B. Carter, \$1,000 to \$1,300; Nathaniel M. Abrose, \$1,800 to \$2,000.

It is not exactly clear who these gentlemen are and it is not believed they were ever bona fide residents of the territory, but as they are credited to the territory and as there is no way to right such matters, a kick will not be of very great avail, but the kick is made and registered anyway. The federal offices and clerkships in New Mexico and those to which New Mexico is entitled in the departments at Washington should go to actual and bona fide residents of the territory. Such is the intention of the law, and equity and justice so demand.

Cuban and Porto Rican Trade.

The letters which have come from Santiago, written by the men in the army of occupation, all speak in praise of Cuba and its possibilities as a land of homes and money making, provided there was some form of government established that would protect life and property. That a stable government will soon be established is evidenced that in the reported conditions upon which Spain can secure peace is the abandonment of sovereignty over the island with a provision that Cuba shall be absolved from all debts heretofore charged against it by the Madrid government. What the form of government will be has not yet been decided upon, but it will probably result in annexation to the United States. However, a good government will be formed and maintained, and the commercial future of the island will be assured. The same conditions apply to Puerto Rico, which is now virtually in the hands of the United States.

Feeling that it is only a matter of a short time when Cuba and Puerto Rico will be controlled by this government, merchants and ship owners in the east are making active preparations for the revival of trade with the West Indies which must follow the establishment of peace on the two principal islands of the group. These two islands have bought as much as \$25,000,000 worth of goods in a single year from the United States and they have sent as much as \$80,000,000 worth of merchandise to this country in 12 months. Under favorable conditions this trade will be much larger and more certain.

The feature of this business which interests the masses of the American people at the present is not the profits it will yield the men engaged in it, but the relief of the unfortunate Cubans and Puerto Ricans that is involved in the revival of trade. Food, clothing and other supplies will be loaded on Cuban and Puerto Rican ports as fast as they are opened to the reception of vessels, and the rapidity with which normal conditions of trade will be restored will be an interesting exhibition of the enterprise of American merchants and shipping firms.

The Americans' share in this transformation will be not alone the shipment of needed supplies, but many citizens of this country will take an active part in reviving the productive industries of the islands. The experience at Santiago will be of great assistance in restoring normal conditions in the next port opened to trade, and the task will become less difficult with every advance made by American arms.

The Lee-Gilliland Cases.

(Silver City Enterprise.)
Oliver Lee and James Gilliland, who are suspected of being the murderers of Colonel Fountain and his little son, murdered one of the officers sent to serve the warrant for their arrest last week. These men refused to surrender unless they were allowed their liberty on bond. A pretty pass this territory has come to when outlaws propose to dictate how the laws shall be administered. These men should be arrested without delay, no matter if it takes an hundred officers to hunt them down, and regardless of cost. The governor should see that it is done.

The Bland Herald Speaks for Itself.

(Bland Herald.)
With this issue the Herald begins its third year of existence under one continuous management. When it was started in July 1, 1896, it was predicted that the Herald would not live out three months. It is especially gratifying therefore, that we can say that the Herald is in a fair way to live three years instead of that many months, and still continue to carry on its labor for the great Goshute mining district. To its friends the Herald extends its gratitude for their favors of the past and requests a continuance of them during the future years. In return it promises the satisfactory service it endeavored in the past to render, and which has proved to be of much benefit to the entire camp.

W. H. Llewellyn For Delegate.

(Albuquerque Citizen.)
A number of Republicans suggest the name of Captain W. H. Llewellyn, of the gallant "Rough Riders," as the Republican nominee for delegate to congress. The party would make no mistake in nominating Captain Llewellyn. He is admirably qualified for the position, being a man of experience and intelligence. His war record is magnificent. Captain Llewellyn is a personal friend of President McKinley, Senator Allison and other Republican leaders, and in congress could be of immense benefit to the territory. The war with Spain is practically over, and the gallant "Rough Riders" will no doubt soon be home, which would permit the candidacy of Captain Llewellyn. Southern New Mexico has never had a delegate to congress and would no doubt roll up a big majority for Captain Llewellyn. If Bernalillo county does not present a Republican candidate for delegate, the citizen knows none it would sooner help elect than the gallant "Rough Rider" captain, W. H. Llewellyn.

DR. WALTER McM. LUTTRELL,
Mescalero Indian Agent.

The New Mescalero Indian Agent.

Dr. Walter McM. Luttrell, recently appointed agent of the Mescalero Apaches in southern New Mexico, has just assumed charge of his duties.

Dr. Luttrell is a native of Tennessee, having been born in Knox county in that state in 1868, making him 30 years of age. His parents are of the oldest families in the state, dating their lineage back into the Irish and Scottish clans of the old country. Dr. Luttrell may in every sense be termed a self-made man. Born to the hard work of a Tennessee farm he has by dint of pluck and energy carved a way for himself until today he stands an enduring example to American youth of the opportunities that may be seized and conquered under our institutions, and can point with pride to an honorable service of years in the employ of the United States and a standing in his chosen medical profession that may well be the envy of many older in age and practice than himself.

A graduate of the public school system, forced by the requirements of a large family to start for himself early in life, he by hard work and strict economy succeeded in entering and graduating from the University of Tennessee, where he won the gold medal for proficiency in military tactics. A subsequent course was then taken in the Spencerian Business college at Washington, D. C., graduating therefrom in 1890. During President Harrison's term, he was appointed to a position in the surgeon general's office in Washington under the civil service and was later transferred to a more honorable and lucrative position in the record and pension office, a transfer based solely on his record for appreciation, efficiency and devotion to duty. During this period all his spare time, day and night, was given up to attendance at the medical department of the Georgetown University, from which he graduated with the highest honors in September, 1893, subsequently spending two years in the Columbian medical college and hospitals of Washington and Philadelphia.

He was appointed agency physician at the Mescalero Apache agency in August, 1895, and has filled such position to the entire satisfaction of his superior officers from that time to the present date. A successful practice among the people of the surrounding section has given him a reputation among the people of the south-eastern New Mexico that places him in the fore rank and a standing that few physicians ever equal.

Dr. Luttrell claims New Mexico as his domicile. He has located in this territory for good, and will make the interests of his chosen section his own. The advent of such energy and persistent application to a newly developing country like the Mescaleros cannot but be beneficial to both, and it were well if New Mexico had more of it. Dr. Luttrell will have the unwavering support of the New Mexican in carrying out the policy of his predecessor, Captain Stottler, U. S. army, in making the wily Apache self-supporting with a view to ultimately abolishing this reservation and throwing same into the public domain.

ferred to a more honorable and lucrative position in the record and pension office, a transfer based solely on his record for appreciation, efficiency and devotion to duty. During this period all his spare time, day and night, was given up to attendance at the medical department of the Georgetown University, from which he graduated with the highest honors in September, 1893, subsequently spending two years in the Columbian medical college and hospitals of Washington and Philadelphia.

Dr. Luttrell will have the unwavering support of the New Mexican in carrying out the policy of his predecessor, Captain Stottler, U. S. army, in making the wily Apache self-supporting with a view to ultimately abolishing this reservation and throwing same into the public domain.

Recent conferences between Commissioner Halm, of the Denver freight bureau, and General Freight Agent Gay, of the Santa Fe, have resulted in a readjustment of the rates from Denver to all points in New Mexico reached by the Santa Fe system, by which Denver merchants and manufacturers will be able to reach that territory. This is an important concession that will be appreciated by the business public. It will put Denver in closer touch with such points as Raton, Las Vegas, Albuquerque and El Paso, not to mention points on the Santa Fe-Pacific in Arizona. This is a large and growing trade area and its opening to Denver ought to have an immediate effect on the wholesale trade of this city. The concession is a just one on the part of the Santa Fe, for in adding to build up Denver as the great distributing point of the Rocky mountain country the company will also increase its claims on the traffic between Denver and the east.

RECORD AND BRIEF WORK.
Transcript, record and brief work for attorneys at the New Mexican printing office for the approaching session of the Territorial Supreme court, printed at the lowest possible figures and in the neatest, best and most acceptable style. Patronize the New Mexican Printing Co., and you will get first-class work, besides supporting an institution that is at work daily for this city, this country and the entire territory of New Mexico.

The New Mexican Printing Company

IS THE PLACE FOR

Mercantile Stationery

—MANUFACTURER OF—

Blank Books and Ledgers.

THE SEVENTH Beet Sugar factory in the United States was erected at Eddy, New Mexico, in 1896, and made its first "campaign," beginning November 15th, 1896, and closing February 16th, 1897.

THE CONTENT OF "SUGAR in the beet" of the crop grown in the Eddy and Roswell sections of the valley has proven to be more uniformly high than any other part of the United States.

FORTUNATELY the land is blessed with just the fertility to produce high grade beets, and

MORE FORTUNATELY the Pecos Irrigation and Improvement Co. and the Roswell Land and Water Co. have an irrigation system of great magnitude, covering a vast body of the BEST SUGAR BEET lands on earth. The water is applied to the crop WHEN NEEDED.

THE SUN SHINES more hours in the day and more days in the year in Eddy and Chaves counties, New Mexico, than in any other section of the west.

194 separate analysis, chiefly carload lots, showed AN AVERAGE of 17.01 per cent sugar in beet; 84.1 per cent purity.

THIS REMARKABLE RESULT was accomplished by raw farmers, unacquainted with the culture of beet root, on new land and under very trying circumstances, as the factory was not assured until May, and a majority of the acreage was planted between JUNE 1st AND AUGUST 10th.

THE SUGAR BOWL OF THE GREAT SOUTHWEST
Is the Rich Valley of the Rio Pecos.
IN THE COUNTIES OF
EDDY AND CHAVES
OF NEW MEXICO.

GOOD SOIL makes the seed germinate.
WATER makes the plant grow.

SUNLIGHT puts the sugar in the BEET.

THE ONLY THING left to be desired that the Pecos Valley has not on hand in abundance is PEOPLE. We need thrifty farmers; 500 heads of families each on a 40-acre farm.

NO FAIRER terms or conditions of sale of beet and fruit lands were ever made.

WRITE for particulars.

ROSWELL, NEW MEXICO.

Wants the Republican Convention.

(Raton Range.)

As Raton never has had the Republican territorial convention, it is understood that our enterprising people will make an effort to have the next meeting held here. Our city now has ample facilities for caring for such an assemblage of distinguished visitors, and our people will make the necessary efforts to secure its location.

Rates to New Mexico.

(Denver News.)

For many years Denver has been shut out of New Mexico, which is a portion of her natural trade territory, on account of the rates on the Santa Fe. The policy of the company was to encourage shippers via Kansas City, Chicago and St. Louis, because on them the company got a longer haul. The company has no antagonism to Denver as a distributing center, but its interests were naturally in favor of promoting trade from points which would yield it a larger revenue on the business. Just as an individual would have done, the corporation pursued the policy by which the most money was made.

Recent conferences between Commissioner Halm, of the Denver freight bureau, and General Freight Agent Gay, of the Santa Fe, have resulted in a readjustment of the rates from Denver to all points in New Mexico reached by the Santa Fe system, by which Denver merchants and manufacturers will be able to reach that territory. This is an important concession that will be appreciated by the business public. It will put Denver in closer touch with such points as Raton, Las Vegas, Albuquerque and El Paso, not to mention points on the Santa Fe-Pacific in Arizona. This is a large and growing trade area and its opening to Denver ought to have an immediate effect on the wholesale trade of this city. The concession is a just one on the part of the Santa Fe, for in adding to build up Denver as the great distributing point of the Rocky mountain country the company will also increase its claims on the traffic between Denver and the east.
